Features and Benefits

Stanley's hydraulic chain saws offer the highest power-to-weight ratio of any chain saw on the market today. They're ideal for bucket truck use because of their wide range in flow and pressure requirements.

Safety has been designed in with interlocking triggers, bucking spurs and hand guards on all models. Hydraulic power doesn't require a flywheel to smooth power pulses so there is no chain coasting when you release the trigger. Kick-back is also reduced without the centrifugal force from the flywheel used on gas driven saws.

The **CS11** hydraulic chain saw is designed for extreme-duty applications. With many available bar lengths (up to a 43-inch/109 cm cut), the **CS11** can handle bridge pilings, railroad ties and utility poles.
